

Marina Claudia Caillaud (cmc27@cornell.edu) – Entomology Lecturer in the College of Agriculture and Life Sciences at Cornell University. Taught Honey Bees: Their Intriguing Biology and Interactions with Humans in Spring 2014.

Nicholas W. Calderone (nwc4@cornell.edu) – Retired Cornell faculty member in the Department of Entomology. Studied honey bees and the development of programs to solve problems facing the beekeeping industry. Conducted both basic and applied research on honeybees, maintained an active, multifaceted extension program that provides education and training in the skills required to be a successful beekeeper, and taught undergraduate classes on the biology of the honey bee and practical beekeeping. Ran the Dyce Laboratory for Honeybee Studies.

Bryan Danforth (bnd1@cornell.edu) – Professor in Cornell University's Department of Entomology. Studies the role of wild (native) bees in crop pollination. Bryan is also the principal investigator at Danforth Lab, and studies molecular biology, molecular and morphological systematics, and bee diversity at the lab.
