‘Tully Champion’ *Salix viminalis* x *S. miyabeana*

‘Tully Champion’ is a high-yielding shrub willow that is disease resistant, produces multiple small stems, and is aesthetically appealing. It is well suited for biomass plantings, privacy hedges, snowfences, and ornamental plantings.
‘Tully Champion’  *Salix viminalis* x *S. miyabeana*  

**Botanical Name:**  *Salix viminalis* × *S. miyabeana*  ‘Tully Champion’  
(Family: Salicaceae)  

**Hardiness:**  U.S.D.A. Zones 4 - 6  

**Development:**  ‘Tully Champion,’ thought to be triploid, was produced through controlled willow breeding in 1999 as part of a research project to produce new willow cultivars that generate high biomass yields on a variety of sites, display resistance to diseases and pests, and possess agronomic traits suitable for mechanical planting, harvesting, and post-harvest processing. ‘Tully Champion’ was produced by crossing *Salix viminalis* ‘SV2’ with *S. miyabeana* ‘SX67,’ a putative tetraploid.  

**Significance:**  ‘Tully Champion’ is a shrub willow cultivar displaying exceptionally rapid growth, producing approximately 4 dry tonnes per acre in yield trials, and exhibiting low incidence of rust disease or damage by beetle or sawfly. Woody stems can be harvested every three to four years, and new shoots will re-sprout the following season. Repeated harvesting of shrub willow plantations can be sustained for at least 15 years.  

**Description:**  
**Height and Width:**  15-20 feet tall, 3-5 foot crown spread at 3 years when grown at 2 x 3 foot spacing.  
**Habit:**  Fast-growing, upright, deciduous shrub with multiple small-diameter, vertical stems.  
**Foliage:**  Green oblong leaves, typically 3-3.5 inches long, 0.5-1 inches wide, with foliage April through October in Zone 5.  
**Bark:**  Grey-orange when young, turning yellow-green with age; red buds in winter.  
**Flowers:**  Female, early spring.  
**Seeds:**  Small number of viable seeds produced in early spring  

**Culture:**  Adaptable to a wide range of soil and moisture conditions. Prefers maximum sunlight.  

**Propagation:**  Roots easily from dormant stem cuttings.  

**Uses:**  Excellent for bioenergy plantations, living snowfences, privacy hedges, and ornamental plantings.  

**Availability:**  Available from Double A Willow (www.doubleawillow.com)
