Set Up for Cleaning System

1. Fill 3 chemical cups according to chart amounts. (DANGER! Do not mix chemicals! Poison gas will be created.)

2. Fill matching 3 wash jars with liquids in chemical cups.

3. When jars are filled, switch code to number that matches your milking shift. 1 = Morning, 2 = Afternoon, 3 = Evening

4. Reverse pipeline and tank line setup as described in “Milkhouse and Parlor Setup” SOP.

5. Close chemical station window.
