

The Ecology of the Mobile Worker

Excerpt 2 - Mobile Work and Work Effectiveness

Becker, F., Quinn, K. L., & Callentine, L. U. (1995). *The Ecology of the Mobile Worker*. Ithaca, NY: Cornell University International Workplace Studies Program.

Approximately half of the respondents (52%, n=55) reported that their overall work effectiveness was better or much better, 30% (n=31) were neutral about the impact of the mobility program on their overall work effectiveness, and 18% (n=19) rated their overall work effectiveness as worse or much worse.
