Policy Analysis and Management

- **Hertog Fellowship -- Political Studies Summer Program**
  - This highly competitive fellowship is designed to reflect the broad curriculum of the Hertog Foundation. Hertog Summer Fellows take courses in a wide variety of subjects, from political philosophy to contemporary public affairs, from economics to foreign policy.
  - All students receive full scholarships, complimentary dormitory accommodations, and a $2,000 stipend to offset travel and living expenses.

- **Google Public Policy Fellowship**
  - The Google U.S. and Latin America Policy Fellowship program offers undergraduate, graduate, and law students interested in Internet and technology policy the opportunity to spend the summer contributing to the public dialogue on these issues, and exploring future academic and professional interests.
  - Google will provide a stipend of $7,500 USD for each Fellow for the summer.
  - Fellows will have the opportunity to work at public interest organizations at the forefront of debates on broadband and access policy, content regulation, copyright and creativity, consumer privacy, open government, government surveillance, data security, data innovation, free expression and more.

- **The Villers Fellowship for Health Care Justice**
  - Villers Fellows work in the health policy department and assist the organization’s efforts to improve access to health coverage for all Americans, especially for low-income and other vulnerable communities. Specifically, Villers Fellows will conduct research on a range of health care policy issues, and write and contribute to publications that are relevant to current health policy debates.
  - The Fellowship is a year-long, full-time, salaried position at the office in Washington, DC.

- **American Institute for Economic Research Summer Fellowships**
  - The American Institute for Economic Research (AIER) offers a two-week fellowship program which takes place at AIER’s campus in the Berkshire Mountains of western Massachusetts, where students participate in three core seminars and attend lectures by visiting scholars on a variety of economic topics. Fellowship’s provide for room and board during the two-week residence, plus a small stipend.
  - The program is open to graduate and rising senior undergraduate students age 21 and over majoring in economics, finance, business or related fields.

- **The Charles B. Rangel International Affairs Summer Enrichment Program**
  - The Charles B. Rangel International Affairs Summer Enrichment Program is a six-week summer program designed to provide undergraduate students with a deeper appreciation of current issues and trends in international affairs, a greater understanding of career opportunities in international affairs, and the enhanced knowledge and skills to pursue such careers.
  - The Program has two major components. First, the Program provides two courses and a seminar that focus on enhancing knowledge and skills related to U.S. foreign policy, economics and writing. In addition, the Rangel Program introduces the participants to a wide range of government and non-government professionals who work on global issues and also arranges visits to various institutions involved in international affairs.
  - The Program covers the costs for tuition, travel, housing, and two meals per day. It also provides a stipend of $3,200.
• **The Eben Tisdale Fellowship**  
  - The Eben Tisdale Fellowship offers outstanding opportunities for students to learn about high-tech public policy issues with hands-on experience in Washington, D.C.  
  - The Fellowship provides a full scholarship of $8,695 to attend the Institute on Business and Government Affairs (IBGA) as well as a $1,000 stipend.  
  - Through IBGA, Tisdale Fellows will be placed with a high-tech company, firm or trade association, take two classes worth six credits from George Mason University, and live in furnished apartments on George Washington University’s downtown campus. Fellows will also attend weekly issues seminar lunches hosted by Tisdale sponsors, as well as briefings at institutions such as the U.S. Capitol, Department of State, World Bank and Federal Reserve.

• **Hudson Institute Political Studies Fellowship**  
  - Hudson Institute Political Studies offers top undergraduates a Summer Fellowship in political theory and practice that broadens and deepens understanding of public policy and American political principles. The Fellowship combines rigorous study of politics and political thought through week-long seminars led by master teachers, policy workshops featuring think tank experts and experienced government officials, and a distinguished speaker series of exemplary figures from public life.  
  - The fellowship is hosted at Georgetown University in Washington, DC, and lasts for six weeks. Students participate free of charge, are given complimentary accommodations, and receive a $3,000 stipend.

• **The Coro Fellows Program**  
  - Applicants will join an intimate cohort of 12 participants for the nine-month program, with each cohort encompassing a wide range of communities, interests, ideologies and experiences.

• **California Senate Fellows Program**  
  - Established in 1973, the California Senate Fellows (CSF) program is one of the oldest and most distinguished service learning programs in the country. The CSF program grew out of a desire to provide people with insight into the legislative process through experiential learning. It offers college graduates a paid, full-time legislative staff position in the State Capitol for 11 months.  
  - Fellows receive a monthly stipend of $2,698 plus full health, vision and dental benefits. They also earn 6 units of graduate credit from the Sacramento State Political Science Department.

• **American Enterprise Institute’s Summer Honors Program**  
  - The American Enterprise Institute’s Summer Honors Program is a series of educational and professional development opportunities in Washington, DC, for top undergraduate students. Students in the program have the chance to connect with the ideas, research, and network of AEI, one of America’s preeminent think tanks.  
  - Students participate in either a single one-week course or a multi-week opportunity at the start of the summer in Washington D.C. This is a fully-funded program. Housing, meals on class days, stipends and travel vouchers are all provided.

• **Global Health Corps**  
  - Global Health Corps is building the next generation of diverse health leaders. We offer a range of paid fellowship roles with health organizations in Malawi, Rwanda, Uganda, the United States, and Zambia and the opportunity to develop as a transformative leader in the health equity movement.  
  - Fellows receive a living stipend that varies based on location and placement organization, a award of $1500 upon successful completion of the fellowship year, housing, insurance, support with visas and/or work permits, travel costs, and professional development funds.

• **Minority Health Disparities Fellowship**  
  - The University of Arizona Graduate College offers a prestigious summer research opportunity focused on health issues that affect minority communities in a disproportionate manner.
Benefits include: $4000 stipend, on-campus housing, six units of upper division research credit, weekly speaker series focused specifically on biomedical research related to minority health disparities, workshops focused on issues related to biomedical research and graduate school preparation

- **The University of Delaware's College of Agriculture and Natural Resources Summer Research Fellowship**
  - Program offers summer research education experiences to undergraduates who are interested in pursuing an advanced degree in the agricultural, natural resource, or life sciences. During the 10-week Summer Institute, students will work closely with CANR researchers on projects that will provide "real-world" experiences in scientific careers. Participation in the Summer Institute is awarded through a competitive application process and freshmen, sophomores, and juniors are encouraged to apply.
  - Students will each receive a $4,000 stipend for personal and food expenses and can be reimbursed (up to $500) for round-trip travel to participate in the program. Additionally, housing and/or parking permit costs will be covered if students live in University residence halls or need to have a car on campus.

**Design and Environmental Analysis**

- **Windgate Fellows - the Center for Craft**
  - Each year, the Windgate Fellowship identifies ten graduating college seniors with exemplary skill in craft. Awardees receive $15,000 – one of the largest awards offered nationally to art students.

- **NuVu Design + Technology Fellowship**
  - NuVu is a place where students and teachers explore ideas outside of disciplinary boundaries and immerse themselves in the innovation process. Under the guidance of designers and experts, middle and high school students solve problems through a critical, rigorous, and iterative process. Our pedagogy is rooted in the architectural design studio, but our team has expertise in industrial design, architecture, robotics, engineering, fashion, art, music, filmmaking, and graphic design; this diversity fosters the innovative environment that complements the passion and potential of young learners.
  - We are seeking a candidate with interests in design, technology and education to join our team as a “Coach” at one of our partner schools, the Episcopal School of Baton Rouge. Our Coaches are responsible for leading studios where they brainstorm, design, and create with the students. They also work alongside other Coaches and experts from various fields in a dynamic studio setting.
  - The NuVu Design + Technology Fellow will be a Coach based at the Episcopal School of Baton Rouge who will assist in the development of studio projects. The Fellow, in conjunction with Coaches from NuVu in Cambridge, will be a key resource for students in the design and execution of projects over the course of the school year. An ideal candidate is passionate about education and excited about expanding their own knowledge and creativity.

- **Center for Public Interest Design (CPID) Fellowship**
  - The Center for Public Interest Design (CPID) is a research center at Portland State University that aims to investigate, promote, and engage in inclusive design practices that address the growing needs of underserved communities worldwide. Through research and design, fieldwork, and public outreach, we promote a mode of practice that is socially conscious, environmentally sustainable, and economically accessible to all.
  - The CPID Student Fellows program is designed to give outstanding graduate and upper level undergraduate students the opportunity to gain valuable experience outside of the classroom through extended participation in a public interest design project. Student Fellows are given a leadership role on an active CPID project under the guidance of one of its faculty members. Through this fellowship, students may receive IDP credit, work experience, fulfillment of practicum hours toward the Public Interest Design Certificate at PSU, and access to special events and opportunities.
Global and Public Health Science

• **University of Michigan Future Public Health Leaders**
  - FPHLP incorporates a multi-prong curriculum that integrates both real-world field experience and seminars and workshops designed to aid students in their exposure of public health careers. FPHLP participants will be placed at sites working on improving community health in the Greater Ann Arbor area. Additionally, FPHLP participants will engage with UM-SPH faculty, community and government health leaders and FPHLP staff in workshops and seminars designed to complement participant’s field placements.
  - Benefits include: mentorship, portfolio development, and a community research project.

• **Morehouse College Public Health Leader Fellowship Program**
  - The CDC Public Health Leader Fellowship Program (PHLFP) at Morehouse College is a rigorous 10-week summer program designed to prepare underrepresented, culturally sensitive, undergraduate students for leadership roles in the field of public health. A principal aim of the program is reducing health disparities. The program includes 2 weeks of public health educational training at Morehouse College with didactic learning in topics that include: Introduction to Biostatistics, Introduction to Epidemiology, Scientific Writing, and Public Health Leadership. Students also participate in a 3-day session at the Centers for Disease Control and Prevention’s (CDC) headquarters in Atlanta. During the remaining 8 weeks of the program, each student is paired with a mentor to conduct a hands-on research project within CDC's National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention (NCHHSTP).

• **Summer Public Health Scholars Program**
  - The Summer Public Health Scholars Program (SPHSP) is designed for undergraduate students and its goal is to increase interest in and knowledge of public health and biomedical science careers. SPHSP is a partnership of the Columbia University Vagelos College of Physicians and Surgeons, College of Dental Medicine, School of Nursing, and the Mailman School of Public Health. Together, they represent the broad spectrum of public health practice. SPHSP was awarded by the Centers for Disease Control and Prevention (CDC), Office of Minority Health, and Health Equity (OMHHE), under the CDC Undergraduate Public Health Scholars Program (CUPS).

• **Aids United: Pedro Zamora Public Policy Fellowship**
  - The Pedro Zamora Public Policy Fellowship prepares current students or recent graduates for a lifetime of social justice advocacy. Working closely with the AIDS United Policy Department, Zamora Fellows gain a professional understanding of HIV, advocacy, and public policy and practical advocacy experience in a supported environment.

• **The Villers Fellowship for Health Care Justice**
  - The Villers Fellowship for Health Care Justice was created in 2005 to inspire and develop the next generation of health care justice leaders. The goals of the Villers Fellowship Program are to develop a network of young leaders who share a passion for social and health care justice, to inspire Villers Fellows to continue to work for health care justice throughout their lives; and help achieve Families USA’s goal of guaranteed, high-quality, affordable health care for all of us.
  - They will also be exposed to different advocacy strategies, including producing analytic reports, disseminating effective messages through the media, successful coalition building, and e-advocacy techniques.
  - This program is a year long.

• **The Wellstone Fellowship for Social Justice**
  - The Fellow will be engaged in health care advocacy work in Families USA's office in Washington, DC, where he or she will learn about Medicare, Medicaid, efforts to achieve universal coverage, and other important health policy issues. Specifically, the fellow will be engaged in Families USA's outreach to and mobilization of communities of color. At the same time, the Wellstone Fellow will learn about conducting health care campaigns through communication and collaboration with our network of state grassroots advocates and organizations. The ideal candidate will express an interest in social justice work and in working with communities of color. Additionally, we are looking for an individual who displays the potential to continue to contribute to social justice
• The fellowship will last one year, and Fellows will receive a compensation package that includes an annual stipend of $38,000 and excellent health care benefits.

• **Public Health Sciences Institute - Project Imhotep**
  • Project Imhotep is an eleven-week summer internship program designed to increase the knowledge and skills of underrepresented minority students in biostatistics, epidemiology, and occupational safety and health. The program begins with two weeks of intense educational training in public health courses such as Public Health & Health Disparities, Epidemiology, Biostatistics and Scientific Writing. During the following nine weeks, interns are paired in a one-on-one mentored relationship with experts at CDC, academic institutions, local and state agencies, or community based organizations to complete a public health research project. In addition, interns participate in a variety of seminars, workshops, educational initiatives and are required to complete 16 hours of community service.  
  • Interns will receive a stipend, lodging on the campus of Morehouse College, course credit and travel expenses to and from their city of origin.

• **Loma Linda Summer Undergraduate Research Fellowship**
  • The Loma Linda University School of Medicine provides opportunities for undergraduate science, technology, engineering, and math (STEM) majors to gain experience in biomedical research. This program is intended for students interested in working with Ph.D. scientists or M.D./Ph.D. physician scientists who are conducting research in biomedical fields with the objective of advancing our knowledge and treatment of human disease. Students admitted to the SURF program will work in a research laboratory conducting experiments and will attend a weekly lunchtime program meeting. Towards the end of the program, students will present their research findings on a poster at a one-day research symposium.

• **Interns will receive a stipend, lodging on the campus of Morehouse College, course credit and travel expenses to and from their city of origin.**

• **Herbert Scoville Jr. Peace Fellowship**
  • The Herbert Scoville Jr. Peace Fellowship, established in 1987, is a highly-competitive national fellowship program that provides recent college and graduate school alumni with the opportunity to gain a Washington perspective on key issues of peace and security.
  • Supported by a salary, the fellows serve as full-time junior staff members at the participating organization of their choice for six to nine months in Washington.

• **Carnegie Endowment for International Peace Junior Fellows Program**
  • Each year, through the James C. Gaither Junior Fellows program, the Carnegie Endowment for International Peace offers approximately 12-14 one-year fellowships to uniquely qualified graduating seniors and individuals who have graduated during the past academic year.

• **Autry Fellowship**
  • The ideal Autry Fellow is deeply committed to advancing social equity and access and is eager to support the mission of MDC—helping organizations and communities in the South close the gaps that separate people from opportunity. MDC provides Autry Fellows with an experience that will enhance their understanding of social change and help further them on their individual path to promoting equity.
  • Benefits include: $30,000 stipend, 10 days of paid vacation leave, subsidized health insurance, competitive 401(k) retirement plan with generous employer match.
• **University of Golisano: Strong Children’s Research Center**  
  - This summer research training program is the ideal opportunity for outstanding medical, graduate and undergraduate students who plan to pursue a career in biomedical or clinical research. This program is created to develop fundamental skills in various research methodologies in a defined project, leading to an end-of-summer poster presentation.  
  - Participating students are paid a stipend of $3000 for the ten-week program. In addition, the program provides housing, free of charge, to out-of-area program participants at a residential life facility with full bath and kitchen. Travel costs are to be paid by the student. Students must have their own medical insurance coverage for the duration of the program.

• **Maternal Child Health Careers -- Research Initiatives for Student Enhancement**  
  - The MCHC/RISE-UP Program provides opportunities for enhanced public health leadership training in the area of maternal and child health focusing on social determinants of health, elimination of health disparities, and developmental disabilities.  
  - MCHC/RISE-UP’s ultimate goal is to promote a more equitable health system by introducing highly qualified diverse undergraduate and recent baccalaureate degree scholars to the field of public health.  
  - A $3,500 stipend is provided for Kennedy Krieger Institute and University of South Dakota (10-week) and $3,000 is provided for University of California (8-week) program participants. Air flight and housing for the CDC visit are paid by the program. Consortium site housing and round-trip travel for out-of-state scholars are also available.

**Human Biology Health and Society**

• **Collegiate Leaders in Environmental Health**  
  - This is a paid 9-week summer environmental internship for current undergraduate students (rising junior or senior) who are passionate about the environment, interested in human health, and curious about how they are linked.

• **Summer Undergraduate Research Fellowship**  
  - The Department of Molecular & Physiology at the University of Michigan Medical School is pleased to offer the Summer Undergraduate Research Fellowship (SURF) program, to support undergraduate students that are interested in research in physiology and/or biomedical sciences. The funding for 2018 will be $4,200 for twelve weeks of full-time work.

• **Summer Internships in Biological Sciences in Public Health**  
  - This 8 week laboratory-based biological research program is for undergraduates during the summer following their sophomore or junior years. The program goal is to expose college science students to the rewards of laboratory research directed toward solving important public health problems. Interns apply state-of-the art technology in their own research projects under the direction of a Harvard faculty member. Research projects focus on biological science questions that are important to the prevention of disease.  
  - Financial support over the course of 8 weeks includes a stipend of $3,600, a travel allowance of up to $500 and free dormitory housing.

• **Mickey Leland Energy Fellowship (MLEF) Program**  
  - Program has provided students with fellowship opportunities to gain hands-on research experience with the Department of Energy’s (DOE) Office of Fossil Energy. The MLEF program was created in 1995 with the goal of improving opportunities for underrepresented students in the science, technology, engineering, and mathematics field.
Fiber Science and Apparel Design

- **UnSchool Fellowship**
  - The fellowship program offers unique and intense learning experiences. You’ll embark on a series of unforgettable adventures with a group of like-minded, whip-smart people. Additionally, you will learn game-changing skills for active Sparticipation and social change making.

- **Design + Diversity Conference’s National Fellowship Program**
  - The Design + Diversity Conference’s National Fellowship Program identifies emerging underrepresented designers from across the country who are passionate about making positive change within their communities, as well as the creative industry. Through this fellowship, our goal is to address the high cost of entry into design by providing the essential tools and mentorship needed to jumpstart their careers.
  - Benefits include: Free admission into the Design + Diversity Conference, inclusive of airfare and hotel, admission to fellow-only programming in which they will receive hands-on mentorship from design leaders, 1-year subscription of Adobe Creative Cloud, 1 year of free web-hosting through Adobe Business Catalyst for their portfolio website.
