WEBINAR SERIES TWO –
COVER CROP MIXTURES WITH DR. CHARLES WHITE AND
SOIL HEALTH WORKSHOP STIPEND REQUESTS
THURSDAY, MAY 23, 2019

Zoom Meeting:
https://cornell.zoom.us/j/2992896784

Purpose: Get latest research on cover crops from regional expert Charles White of Penn State. Share expectations for being eligible for stipends for Soil Health Workshops; share what we’ve been up to this spring.

Expected outcomes: Participants will be able to have an exchange with Charles on cover crop mixes; provide feedback on the stipend request form

Agenda:

8:00 Welcome and check-in
8:05 Share the Stipend Request form to provide funds for hosting soil health workshops
8:10 Cover Crop Mixtures with Dr. Charles White
   
   Charles White is an Assistant Professor and Extension Specialist of Soil Fertility and Nutrient Management at the Pennsylvania State University. Throughout his research and extension career, he has conducted research on how cover crops can be used to improve agricultural system sustainability. His recent research efforts have focused on optimizing the use of cover crop mixtures to both retain nitrogen against leaching over the winter and supply nitrogen to a subsequent cash crop. Charlie will discuss results from the PSU research station and on-farm sites that show that cover crop mixtures can have benefits and tradeoffs when you consider many services.

8:50 Questions for Dr. White
9:00 Adjourn
