Global Value Chains: Where are You?
The Missing Link in sub-Saharan Africa’s Trade Integration

Regional Economic Outlook for Sub-Saharan Africa
African Department
International Monetary Fund
April 2015
Context

Emerging and Developing Countries:
Annual Average Growth of GDP and Exports, 2000–13

Note: Sample includes emerging and developing countries with 2013 GDP per capita below US$ 20,000.
Sub-Saharan Africa in the Global Trade Network

Trade and Macroeconomic Performance

Policy Options to Integrate into Global Value Chains
A rapid expansion in the last 20 years, marked by new partnerships …

[Sub-Saharan Africa: Exports of Goods, Shares by Partner 1995-2013]

- **Oil exporters**
  - Countries in group: 7
  - GDP share: 42.3 percent

- **Resource-intensive non-oil countries**
  - Countries in group: 15
  - GDP share: 38.3 percent

- **Nonresource-intensive coastal countries**
  - Countries in group: 15
  - GDP share: 11.3 percent
Developments in prices and volumes of exports provided a boost for the expansion of trade ...
... but it is not all about commodities
The rapid expansion of SSA’s trade, however, has barely matched the rapid growth of global trade flows.
Outline

➢ Sub-Saharan Africa in the Global Trade Network

➢ Trade and Macroeconomic Performance

➢ Policy Options to Integrate into Global Value Chains
Expanded trade has been a boon for growth...

Sub-Saharan Africa: Annual per Capita GDP Growth

- 1.4 Other
- 0.6 Openness
- 0.2 Terms of trade
- 2.9
- 4.3

1990s

2000s
...but has not translated into as much productivity gains as in other regions.

Sub-Saharan Africa: Trade Openness and GDP per Person Employed, 1990-2011
Outline

➢ Sub-Saharan Africa in the Global Trade Network

➢ Trade and Macroeconomic Performance

➢ Policy Options to Integrate into Global Value Chains
Still substantial potential for further trade integration...

Sub-Saharan Africa: Trade Flows Compared with Other Regions

Note: Sub-Saharan Africa trade compared with trade of other regions, after controlling for size, level of development, cultural ties, and geographical conditions.
…and integration in Global Value Chains (GVC)

Depth of Integration in Global Value Chains and Real GDP per Capita, Average 1991–95 and 2008–12

[Graph showing the relationship between depth of integration into global value chains and real GDP per capita for Sub-Saharan Africa and the rest of the world, with data points for the ENTIRE SERIES X-Values and Sub-Saharan Africa highlighted.]
Sub-Saharan Africa as a whole still has some way to go to integrate in GVCs...

1 Excluding sub-Saharan African countries.
...but there is heterogeneity across the region
Some countries have made substantial progress

**Selected Sub-Saharan African Countries:**
Sectoral Contributions to Change in Share of Foreign Value in Exports
Added in Exports, 1991–95 to 2008–12
Policy levers to facilitate further trade integration

Note: Percent increase in sub-Saharan Africa's trade if the variable moves from the average for sub-Saharan Africa to the average for the rest of the world.
Bottom Line

➢ A formidable expansion in SSA’s trade over the last 20 years, but still significant potential for further trade integration.

➢ Integration in Global Value Chains can provide that opportunity, and support economic diversification and structural transformation.

➢ Better infrastructure, lower tariffs and nontariff barriers, and improved access to credit, business climate and education outcomes key to that process.
Thank You!
