

Seminar Schedule for Spring 2019

Seminars during the **Spring Semester 2019** will be held **Mondays at 3:00-4:00 pm** at **SEH 3605** Conference Room. The schedule is as follows:

January 28, *Jonathan Kolbeck*, Two-stage micro-thruster update, *Mian Wang*, In vivo plasma application, research update

February 4, *Li Lin*, Plasma jet interaction with cells

February 25, *Eda Gjika*, In situ measurements of cell/tissue response to plasma, *Luis Martinez*, Discharge self-organization simulations

March 4, *Dayun Yan*, Cell activation phenomena, an update

March 25, *Carles Corbella*, Arc discharge for nanoparticle synthesis

April 8, *Ram Bandaru*, Increasing thrust to power of two-stage microthruster, *Keir Daniels*, Micropropulsion research

April 15, *Vikas Soni*, Cellular response to CAP, *Xiaoliang Yao*, CAP and electric field treatment

April 29, *Sungrae Kim*, Air-breathing propulsion
