REU IN CHEMISTRY 2022
Advancing Chemistry Research by Integrating Green Chemistry and Science Policy

Application Deadline - February 28, 2022

Our program provides a unique interdisciplinary research experience for undergraduates that combines environmental and green chemistry with science policy. Students will conduct research projects with a focus on solving fundamental problems related to either green and environmental chemistry or sustainability, targeting applications in renewable energy, water, renewable feedstocks, and healthcare.

Program Details
- 10-week program: May 30 - August 5, 2022
- $6,000 stipend
- Travel and accommodation provided
- Academic, professional development, and social programs
- Summer research in the nation's capital!!
