## Understanding Call Numbers

Have you ever wondered how library books and journals are assigned their places on the shelves?

NTU Libraries, like many major academic libraries in the world, uses the Library of Congress Classification for call numbers. This system uses a combination of letters and numbers to arrange materials by subjects. Therefore, you can often find several helpful books on the same shelf, or nearby.

Below is a selective listing of topics which may be of interest to you.

### Research Topics

### Call Numbers

Asia Economy	HC411 - HC470

# Discovering Our Rich Online Resources

NTU Libraries has a wide range of resources which includes ebooks and ejournals. They are accessible via our homepage at [www.ntu.edu.sg/library](http://www.ntu.edu.sg/library).

Here is a selective listing of specialized databases that can get you started on your research. Access them via **Library Homepage**.

## CEIC Data

CEIC offers accurate, timely and comprehensive economic data. Based on official publications or records obtained directly from issuing sources. More than 90,000 raw data series covering 14 countries in the region are available.

## EconLit

EconLit is a comprehensive bibliography with selected abstracts of the world's economic literature, produced by the American Economic

Association. It covers more than 400 major journals as well as articles in collective volumes (essays, proceedings, etc), books, book reviews, dissertations and working papers.

## Roubini Global Economics

Roubini Global Economics or RGE provides comprehensive analysis of dynamics and developments underpinning the global economy, highlighting macroeconomic signals that can impact investment decisions. RGE covers more than 50 economics including China, India, United States, Japan and Eurozone and provides relevant insights on a broad range of global issues including global macroeconomics, emerging markets, geostrategic and long term issues, finance, banking, and world markets. For first-time user, you will need to register at Roubini to login. Click on the submit button to register.

## EIU.com (Economist Intelligence Unit)

Provides valuable full text quarterly country reports. Subcategories include: Country Intelligence, Country Commerce, Country Finance, Country Forecast, Country Profile and Country Report. Now it includes EIU City Data that allows you to extract the prices of 160 products and services across 123 cities and 79 countries. Products vary from the price of a loaf of bread all the way through to the average electricity bill for a local family. The pricing information dates back from 1990 until the present day, enabling you to compare pricing levels over time

## China Data Online

China Data Online offers macroeconomic and microeconomic data on China. Besides national statistics, the database also captures data on China's provinces, cities and countries. The categories of statistics include National Accounts, Employment, Investment, Price, Finance, Banking, Industry, Transportation, Telecommunications, Trade, Education, Culture, Population and Public Health. Data can be exported in excel, pdf, html or Geographic Information Systems (GIS) Shape files.

## The Economist

Publishes all articles from The Economist print edition plus a searchable archive of all articles

dated back to June 1997. Economist.com analyses world business and current affairs, provides insight and opinion on international news, world politics, business, finance, as well as overviews of cultural trends and regular industry, business, and country special reports.

## United nations Commodity Trade Statistic (UN Comtrade)

Provides more than 3.1 billion commodity trade data (import, export) for all available countries and areas since 1962.

## Factiva

Drawn from more than 35,000 sources, Factiva provides current news and analysis. It also offers same-day and archival coverage of The New York Times, The Straits Times, Wall Street Journal, Financial Times, Fortune, Time, Newsweek and local newspapers from every corner of the globe.
