Understanding Call Numbers

Have you ever wondered how library books and journals are assigned their places on the shelves?

NTU Libraries, like many major academic libraries in the world, uses the Library of Congress Classification for call numbers. This system uses a combination of letters and numbers to arrange materials by subjects. Therefore, you can often find several helpful books on the same shelf, or nearby.

Below is a selective listing of topics which may be of interest to you.

Research Topics

Call Numbers

Aging and the Elderly	HQ1061 - HQ1064
Crime and Deviance	HM811 ; HV6025
Culture	HM621 - HM656
