Proxying to access e-resources

- What is a proxy?

Bob, can you buy oranges at NTUC?

Ok Alice!

Scan IC and buys oranges
Proxying to access e-resources

- The proxy NTU Library uses
- Users connect to the proxy via Full Text Tools (NTU LibBookmark or NTU LibGenie) or proxied links

Further Notes on NTU LibGenie

- Colors
  - Green: Library Access and Alternatives
  - Orange: Library Assist
  - Grey: Shown when there’s no results

- Mobile users will still need the bookmark.

- Assist messages work in the following way:
  - Library Assist messages has a countdown of 10 seconds: Once the countdown ends, it won't show the popup again (this is to avoid end-users seeing the same popup over and over again)
  - If you disable / enable the extension or just simply relaunch your browser, the assist message will be shown again.

- LibGenie does not collect user data.

- When accessing Google Scholar, user does not need to set NTU as one of the Library links. Lean Library will automatically set it as NTU and provide Full Text Links by searching the library holdings.
