Are your students looking for summer research opportunities? Please post, forward, or tell your students about the **2014 Nebraska Summer Research Program** housed on the campus of the **University of Nebraska-Lincoln**.

The program offers students an excellent opportunity to hone research skills and to experience life as a graduate student. Students will enhance their academic resume, work closely with faculty and peers, and have fun with social and professional development activities, all while receiving numerous benefits. **Students historically underrepresented in graduate education are especially encouraged to apply.** Due to funding restrictions, participation is limited to U.S. citizens or permanent residents.

All programs for 2014 are listed at [http://www.unl.edu/summerprogram](http://www.unl.edu/summerprogram) and include projects in Applied Mathematics, Bioenergy Systems, Biomedical Engineering, Chemistry, Earth and Atmospheric Sciences/Water Resources, Minority Health Disparities, Nanohybrid Materials and Algal Biofuels, Redox Biology, and Virology.

Our online application makes it easy for students to apply. **Priority review of applications begins Friday, February 1 and all applications are due by Monday, February 17.**
Thank you for your assistance in disseminating this information.

Sincerely,

Maggie Jobes
Summer Research Program Director
Assistant Director of Graduate Recruitment
Office of Graduate Studies
