COOL TECH BLOGS

- Mashable.com

If you haven't heard of "The Social Media Guide," you just might be living under an old Commodore 64. Updated constantly, and nearly always entertaining, Mashable takes the worlds of Twitter, Facebook, entertainment, news, and everything else techies are talking about and, well, mashes it up into the kind of blog casserole we just can't get enough of.

- Gizmodo.com

Pretty much known as the TMZ of tech after they paid for a "lost" next-gen Apple iPhone — the fallout became front-page news across the world. Scandals aside, Gizmodo's been a must-follow site for a long time, with tons of relevant posts, a youthful vibe, and some of the funnier commenters on the Internet.

- tuaw.com (The Unofficial Apple Weblog)

What's a list of blogs without one of the many different sites devoted to Apple gossip? After all, Apple might have surpassed Microsoft as the world's most valuable tech company while you're reading this article. Of all the blogs devoted to following Steve Jobs and his company's creations, TUAW perhaps does the best job at balancing good writing with nice graphics and pictures.

- Howtogeek.com

Even the best IT "geeks" can't possibly know how to do everything. That's why we love this site, where you can find out [how to remove hyperlinks from Microsoft Word Docs](#), review products, and play a ton of free games, all on the same site. Geeks unite!
