Paddling the Chicago River
A Good Way To Think about Science, Art, Ethics, and the Sustainability of Cities

Mike Bryson
Sustainability Studies Program at RU
Augustana College Winter Symposium
23 January 2013
Cultivating a Sense of Place

Context
Urban Nature in Chicago

Exploring the Chicago River (and beyond)

Art
Representing the river

Sustainability and Ethics
Thinking like a watershed
Chicago's Urban Nature

Chicago in 1857
Jardine Water Filtration Plant on Chicago's downtown lakefront
North Branch of the Chicago River (Spring 2010)
WMRD's Racine Avenue Pumping Station, Bubbly Creek, Chicago (May 2009)
Chicago's Urban Nature

The Stickney Wastewater Treatment Plant, SW of Chicago (courtesy MWRD)
Chicago Area Waterway System: rivers, canals, locks, and controlling structures

Chicago's Urban Nature
Science, Nature, and a Sense of Place

Understanding the river as a modified natural ecosystem (natural sciences)
Developing policies regarding water quality, river use, sewage treatment (social and natural sciences)
Representing the river as a cultural resource (arts and humanities)
Restoring the river: water quality, biodiversity, riparian zone vegetation, citizen access and recreation (all disciplines)
Cultivating a Sense of Place

Sustainability and Ethics
Thinking like a watershed
Canoeing the North Branch

Heading south into the Loop where the branches meet;
Wolf Point in the background (October 2011)
Canoeing the North Branch

Paddling the West Fork of the Upper North Branch: here we portage around a fallen tree, within the greenway of the Cook County Forest Preserve (October 2012)
Canoe trip down Bubbly Creek, an industrialized tributary of the South Branch of the Chicago River (May 2009)
Assessing Water Quality

Temperature

pH

Turbidity

Dissolved oxygen (DO)

Nutrients (nitrate / phosphate)

Bacterial indicators (coliform)

Metals and organic contaminants (lead, copper, benzene, PCBs, hexavalent chromium)

Emerging contaminants (pharmaceuticals, synthetic hormones, flame retardants)

Combined Sewage Outfall
Confluence of the North and South Branches
(October 2011)
Sampling macro-invertebrate benthos in the Chicago River's North Branch (May 2010)
Identifying macro-invertebrates from the Chicago River's North Branch (May 2010)

Thinking like a watershed
In a Sustainable Future:

**Environmental resources** are conserved for both future human generations as well as non-human biota.

**Economic development** occurs not at the expense of the natural environment, but in a way to mitigate ecological costs and impacts.

**Equity** – social, economic, and environmental justice – governs the process of sustainable development.
Salt Creek Watershed

Covering roughly 150 square miles, the Salt Creek watershed incorporates more than 30 municipalities that are home to nearly 500,000 people.
Suburban Hardscape
