

City of Maupin

Community Profile

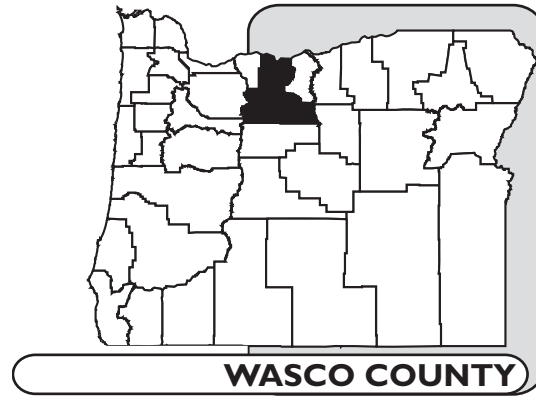

Population 490

Location Maupin

Position Description

Sponsor City of Maupin

Supervisor Dennis Ross,
Mayor

Assignment The City of Maupin requires a well-defined capital improvement plan to maintain and construct new infrastructures projects and primary community structures. The city identified a number of high priority projects such as: paving streets, upgrading sewer and water systems, expanding parks, and rehabilitating community buildings. The RARE participant is working with the City of Maupin to create a capital improvement plan.

Specifically, the RARE participant is compiling data on existing resources and new infrastructure requirements to create a scheduled program for building and maintaining community infrastructure and primary structures. These resources will be used in implementation of the capital improvement plan as well as a parks plan. The participant is also converting infrastructure data into a systems development program.

RARE Participant

Bradley Bobbitt

Bradley Bobbitt is entering his second year with the RARE program and the City of Maupin. He graduated from Hamline University in St. Paul, Minnesota with a BS in Environmental and Urban Studies. As an undergraduate, Bradley received the prestigious Hamline Trustee Scholarship. Bradley's past work experiences include natural resource management with the National Park Service, municipal natural resource management with the City of Burnsville, Minnesota, and GIS mapping with the University of Minnesota's Department of Soil, Water, and Climate. Additionally, Bradley served as an AmeriCorps volunteer.
