PREVENTION SCIENCE

PhD, MS, and MEd Degree Programs

We are pleased to share information about the prevention science graduate degree programs at the University of Oregon. Applications will be accepted every fall and winter for enrollment the following fall.

We offer a 45-credit master of education degree that can be completed in one academic year, a 65-credit master of science degree that can be completed in two academic years, and a four-year doctor of philosophy degree.

Students will be trained in

- risk and protective factors
- lifespan development
- biobehavioral health
- intervention design and evaluation
- dissemination and implementation science
- multicultural and global contexts

The programs have a specific emphasis on understanding and helping underserved individuals and families in the US and globally.

Faculty research is focused on topics in the field of prevention science, including

- child maltreatment
- interpersonal violence
- risk behaviors: delinquency, substance use, sexual behavior
- self-regulation
- mental health
- health disparities and health promotion
- developmental disabilities
- academic achievement and career development
- obesity, eating behaviors, and physical activity

We partner with the UO's Prevention Science Institute to provide students with opportunities to gain experience conducting basic, applied, or translational research: psi.uoregon.edu.

For more information about our application procedures and program requirements, visit uocoe.me/uoprevsci.

An equal-opportunity, affirmative-action institution committed to cultural diversity and compliance with the Americans with Disabilities Act. This publication will be made available in accessible formats upon request.
