S.F.D. House + ADU (Seven Day Project)

INTENT OF THE STUDIO
The housing studio (aka “Housing Boot Camp”) in this format was first introduced as an intense introduction to housing in Fall 2011. The intent of the studio is to examine creative solutions to current issues of affordability, density, sustainability, and new and emerging lifestyles.

PROJECT DESCRIPTION
A series of short exercises, 5, 7, 9 & 12 days each, examining a different housing/site typology (e.g., single-family detached with accessory dwelling units, row houses, courtyard housing, mid-rise buildings or other), will serve as basic research and design for the development of a final project (3+/ weeks) on a larger hypothetical site, utilizing one or a combination of housing typologies previously examined or a new one examined in greater depth.

STUDIO METHODOLOGY
This studio will be a highly structured, professionally oriented, demanding studio format. In order to achieve the most efficient educational objective of understanding issues associated with higher-density low-rise housing, programs for each type will be provided. The studio will also emphasize design process and developing meaningful intentions as a major component of the studio. Each housing type will first be introduced with a summary description and case study examples.

Right now the class format is very fluid in terms of in-class vs. remote studio teaching or a combination of both. We will have to wait until we know later in the summer. While some of the model-making only projects may be reconsidered, I believe we can continue to make this studio highly effective. Some challenges but the short projects should actually help if we are remote. If some form of in-class teaching and reviews are conducted, we will do everything to be safe and allow for individual preferences.

NOTE: This studio is recommended for those with a sincere interest in housing design. However, it is VERY intense and time consuming with weekly design projects (thus former students refer to it as “Housing Boot Camp”). Not for those not willing to work hard.

Room/Outdoor Room (Five-Day Project)
