

How to add a Kanopy video to Canvas:

Recently, the UO Libraries adopted the Kanopy Streaming Service that offers over 26,000 films and documentaries to enhance teaching and learning. The Kanopy service is a great way to “flip” your classroom; students watch relevant videos at their convenience, saving scarce, valuable classroom time for lecture and discussion.

More information on Kanopy’s Streaming Service can be found here:

<https://library.uoregon.edu/node/5325>

To link a video in Canvas:

1. Find your film or documentary at <http://uoregon.kanopystreaming.com/>
2. Below the video, click the **Share/Embed** button, then select **Embed** and note the 6 digit film identifier.

The screenshot shows a video player interface. At the top, the title "Screaming Queens: The Riot at Compton's Cafeteria" is displayed, along with "from Frameline". The video thumbnail shows a woman in a white coat with her arms raised, and a sign in the background that says "DRAG IT OUT IN THE OPEN". Below the video player, there are navigation and sharing options: "Synopsis", "Create Clip/Playlist", "Share/Embed", and "My List". Social media icons for Facebook and Twitter are also present. The "Share/Embed" button is highlighted with a red box. Below this, the "Embed" option is selected and highlighted with a red box. The "Embed this video" section shows a code block with the following HTML: `<iframe width='640' height='390' src='https://uoregon.kanopystreaming.com/embed/107482' frameborder='0' allowfullscreen webkitallowfullscreen mozallowfullscreen'></iframe>`. The number "107482" is highlighted in yellow. Below the code block, there is an "Options" link.

To enable viewing on and off campus the URL must include our libproxy so please copy and paste the link below.

<https://login.libproxy.uoregon.edu/login?url=https://uoregon.kanopystreaming.com/embed/107482>

Note the six digit number at the end of the link. This identifies a particular Kanopy video. You will replace this identifier with the one that corresponds to the video you want to use.

3. Log into Canvas, go to your course and the assignment, discussion, quiz, or page you would like to add your video to. (You can link a Kanopy video into any Canvas area with a rich text editor.)
4. Select **Edit**
5. While holding down the control key (command key ⌘ for Mac users) press the **K** key. An insert link window will open. 1.) Copy the libproxy code into the **URL** box and replace the 6 digit identifier noted in step two with the one associated with your video. 2.) Substitute the URL in the **Text to display** box with your video title. 3.) Select **New Window** for the **Target** and click OK.

6. Add any additional information and then save your work.
