Cost Transfers

Erin Farlow / Tina Mete
Senior Financial Research Administrator
Office of Cost Studies
What is a Cost Transfer (Journal)?

The act of moving a charge from one project/account to another

- Cost transfers can occur:
  - Between two sponsored accounts
  - From a non-sponsored account to a sponsored account
  - From a sponsored account to a non-sponsored account, or
  - Between two non-sponsored accounts
Why are Cost Transfers Problematic?

- A cost that is originally placed on an account is certified for allowability, allocability tests and direct benefit to a project

- A cost transfer invalidates that original certification

Cost Transfer Guiding Principles

• Are for **correcting errors**
• Must **not** be used as a means of managing available cash balances
• Project funds are not interchangeable; the integrity of each grant account must be maintained
• Reasonableness, allowability, allocability, and consistency **must be established**; the need for a cost transfer must reflect adherence to federal cost principles and must be **well-documented**
• Costs applicable to several projects **cannot** be charged solely to a single project
• Costs not allocable to a project **cannot** be charged to that project (even temporarily)
NIH and Northwestern Standards

Cost Transfers

Cost Transfer Standards

Northwestern

- Must be made within 90 days of the original charge
- Transfers of salary charges should take place before certifying effort
- 90 day exception letter needed for transfers made after 90 days*
- Cost transfers greater than 12 months after the date of occurrence*

NIH

- Must be made 90 days after error is discovered
Cost Transfer Documentation

Salaries/wages cost transfers (journals) must be supported by certified effort report if the reporting period has been open in the Effort Reporting System (ERS)

- Links to 90-day cost transfer memo and related references: http://www.northwestern.edu/coststudies/salary-cost-transfers.html
Cost Transfer Red Flags

- Transfers made in excess of 90 days after the original charge
- Transfers without a full explanation or “cookie cutter” explanations (e.g., “to correct error”)
- High volume of transfers (especially during the last month of the award)
- Patterns in timing (i.e., near end of project period) and “route” (mostly onto, and rarely off of sponsored projects) of transfers
- Transfers among “closely related” projects
- Grant to Grant transfer
How to Prevent *Unnecessary* Cost Transfers

- Establishing pre-award chartstrings, when appropriate, can prevent future cost transfers
  - Pre-award spending allows the PI to begin work and record charges against the proper chartstring related to a project before the start of the award
  - Keep in mind that costs are incurred at the institution’s or department’s risk
  - To establish a pre-award chartstring, submit the request via ESPR explaining the need and supplying budget details
- Establishing a financial plan that enables you to proactively charge expenses to the correct chartstrings from the onset
- Communicating with Payroll, recharges centers and other staff that process expenses to the grant
Timeliness and Closeouts

• Submitting cost transfer in time for reporting is a major consideration as the government tightens its closeout processes (e.g., Payment Management System)
• Deadlines for reporting expenses have changed significantly
• What do these new rules mean…
  – Grant expense need to be reconciled by the end date of the grant, not after the grant end date
  – Cost transfers submitted after the grant end date may not make the report and could be denied
    • Department may lose funding if they have not charged expenses timely
