TINKERING WITH MEMORY
presented by Joel L. Voss, PhD
Associate Professor
Departments of Medical Social Sciences, Neurology, and Psychiatry
Northwestern University Feinberg School of Medicine

Wednesday
February 21, 2018
6:30 - 8:00pm
The Firehouse Grill
750 Chicago Avenue
Evanston

How does memory work? What happens when it breaks? How likely is it that we’ll ever be able to fix it? Joel Voss will discuss his laboratory’s research on the brain basis of memory, memory impairment, and how technologies like electromagnetic brain stimulation can be used to better understand and hopefully improve memory abilities.
