

# HOW TO CLEAN AND DISINFECT

Read the disinfectant label and Safety Data Sheet the first time you clean.

Wear disposable vinyl gloves provided by the University.

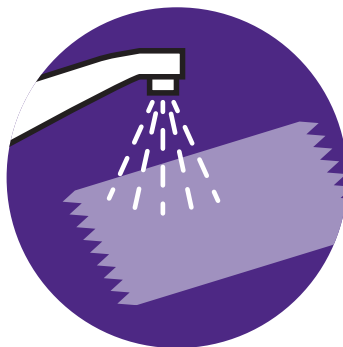

Pre-clean the surface with detergent and water if visibly soiled.

Apply a small amount of disinfectant onto a paper towel.

Wipe the surface lightly yet thoroughly to ensure adequate coverage. Refer to the disinfectant label for appropriate contact time.

For food preparation areas, rinse or wipe the surface with wet paper towels after applying disinfectants. Dry completely.

Remove your gloves and wash your hands thoroughly for at least 20 seconds.

***Disinfectants can be hazardous if misapplied or if they come into contact with food. DO NOT bring chemical products from home or mix one cleaning product with another.***
