SOCIAL AND PHYSICAL DISTANCING IN THE WORKPLACE

Social Distancing is an essential strategy we all must participate in to fight the COVID-19 pandemic.

- Do not wear a face covering in the lab. (Hazardous materials in the lab can contaminate the face covering).
- Wear a face covering in the workplace if you’re in close contact with others.
- Remove chairs from some rooms.
- Maintain at least six feet of distance from others.
- Reposition equipment to allow for social distancing.
- Establish a maximum occupancy that supports social distancing per room and post this information.
- Work that can be done from home should be done from home.
- If possible, create a set path of travel with one entrance and one exit.
