

# SOCIAL AND PHYSICAL DISTANCING IN THE WORKPLACE

**Social Distancing is an essential strategy we all must participate in to fight the COVID-19 pandemic.**

**Wear a face covering in research spaces (such as laboratories). The only exception is if you are working with hazardous materials that may concentrate on the mask and create a dangerous situation.**

**Wear a face covering in the workplace if you're in close contact with others. The only exception is if you work alone in a private office.**

**Remove chairs from some rooms.**
