2nd National Meeting for Research and Community Collaboration towards “Ending the HIV Epidemic in the US”
Session 4
Reports Back from Breakout Groups
A Call to Action: What did we come away with and where do we go?
Dianne Rausch, PhD and Christopher Gordon, PhD

2nd National Meeting for Research and Community Collaboration towards “Ending the HIV Epidemic in the US”

#EHEmeeting2022
Closing Remarks:
What did we come away with -- and where do we go?”

Dianne Rausch, Director, Division of AIDS Research, NIMH
Christopher Gordon, Branch Chief, Division of AIDS Research, NIMH
## Snapshot of CFAR/ARC EHE Projects (N=201)

**Plus, 4 new additional CFAR/ARC Implementation Science Consultation Hubs in FY22**
What did we come away with?  
(Themes from today)

- Relationship Development, Community/Implementer Engagement
- Progress
- Ongoing Lessons Learned
- Consolidation of Findings, Disseminate Innovations/Strategies
- Clear Next Steps

Note: Accomplished during the COVID pandemic (!)
Where do we go from here?

- Report out from this Working Meeting
- Build on these projects – Clear next steps
- (R01 meeting yesterday)
- Responsive Science
- Expansion of Scope and Coverage
New RFA: “Expanding Collaborative Implementation Science to Address Social and Structural Determinants of Health and Improve HIV Outcomes”

The NIMH, in partnership with other NIH Institutes, Centers, and Offices, aims to support implementation science research to strengthen the evidence for effective interventions and implementation strategies that target Social and Structural Determinants of Health (SSDoH) and ultimately improve HIV outcomes and reduce inequities. This initiative will support applications that propose hybrid implementation-effectiveness studies that simultaneously test the effectiveness of interventions addressing SSDoH and implementation strategies to facilitate their uptake or adaptation.

Please contact Dr. Christopher Gordon (cgordon1@mail.nih.gov) or Dr. Suzanne Pollard (suzy.pollard@nih.gov).

RFA-MH-22-190 (R01 applications)
RFA-MH-22-191 (R24 data coordination hub)
Applications due November 18, 2022
Dissemination and Implementation

- JAIDS supplement in early FY22 with ~30 articles reporting findings from single EHE supplements, groups of supplements with similar foci, other high-quality HIV IS studies, and commentaries.
- Develop on-line, searchable databases from scoping reviews:
  - Identify the collection of implementation B&F, strategies, and implementation outcomes for evidence-based interventions identified in the literature
- Develop a “living”, determinant–strategy online matching tool for key HIV EBIs implemented in different contexts.
- Upgrading Community of Practice to serve as resource to researchers and implementers with all tools and resources publicly available.

PLEASE VISIT: https://hivimpsci.northwestern.edu/
THANK YOU ALL AGAIN!
