Thinking of a Major in Science or Math?

Are you interested in exploring the sciences, but don't know which major?

You should begin with the "First Exploratory Course" designated below for the major of interest. Additional first year courses recommended for each of the science and math majors are also listed.

The early requirements in science and math overlap a great deal. They also satisfy the College Core Requirements.

Thus, if you decide NOT to pursue a major in the sciences or math after taking the first exploratory courses, you will likely complete a portion of your core requirements as designated here:

Department	First Exploratory Course	Additional 1 st Year Courses
