

With M. J. Cheon, J. T. C. Teng. (1995) "Theoretical Perspectives on the Outsourcing of Information Systems," *Journal of Information Technology*, Vol. 10(4), 209-219.

Discusses the theoretical development of a critical and pervasive contemporary phenomenon, outsourcing information systems functions, by synthesizing theoretical models useful for understanding determinants of a firm's outsourcing strategy. Role of theory in outsourcing research and practice; Dominance of structural contingency theory in the study of organizational design and performance.
