Requests greater than the base allocation would receive the base allocation plus a percentage allocation of the request above the base allocation.

3. If seed supply is greater than or equal to the amount of seed requested from priority 1 growers then all requests from priority 1 growers will be filled. Requests from priority 2 growers will be filled by setting a base allocation and a cap (maximum amount one grower can receive). Requests greater than the base allocation would receive the base allocation plus a percentage allocation of the request above the base allocation.

4. If seed supply is less than the amount of seed requested from priority 1 growers then requests from priority 1 growers will be filled by setting a base allocation and a cap (maximum amount one grower can receive). 5. For varieties on which no advance deposit is required for the first year and an advance deposit is required for the second year, a grower’s request for the first year will be set at the lowest request for the two years.
