

Bioenergetics: Art Meets Gentle Science in Sickness and in Health

An exhibition featuring artistic and interactive modules to inspire informed lifestyle choices. *Bioenergetics* is a collaborative venture between students, faculty in the Virginia Commonwealth University Schools of Engineering and Arts, community partners, and the Science Museum of Virginia.

Student Contributors

Aidan Collins, Computer Science
Caroline Bivens, Scientific Illustration
Catalin (Dan) Nacu, Scientific Illustration
Emily Nastase, Scientific Illustration, Biology
Emily Tompkins, Scientific Illustration
Gwendolyn Wood, Communication Arts
Jacob Kreiner, Computer Science
Jessica Bishop, Mechanical and Nuclear Engineering
Jessica Soumphonpkady, Kinetic Imaging
Julia Grace Polich, Biomedical Engineering
Katherine Marchese, Scientific Illustration
Kevin Ball, Biomedical Engineering
Michael Todd, Sculpture
Nicholas Montesdeoca, Chemical and Life Science Engineering
Santosh Matthews, Biomedical Engineering
Surjan Singh, Mechanical Engineering

Faculty Advisors

Edward Lesnefsky, V.A. Medical Center
Eugene Maurakis, Science Museum of Virginia
Raj Rao, VCU School of Engineering
Russell Jamison, VCU School of Engineering
Sarah Faris, VCU School of the Arts
Shilpa Iyer, VCU School of Engineering

Other Contributors

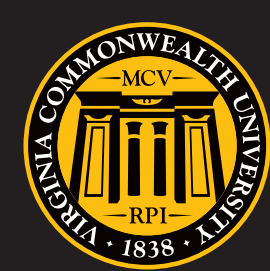

Frank Heller, Science Museum of Virginia
Grace Chafin, Chemical and Life Science Engineering
Judi Bartle, United Mitochondrial Disease Foundation
Laura Hughes, Science Museum of Virginia
Staff, Science Museum of Virginia

Supported by:

VCU Quest for Innovation Fund;
Alice T. and William H. Goodwin, Jr. Endowment for Engineering Education;
Summer at da Vinci Works Program;
Dean's Office, School of Engineering;
Dean's Office, School of Arts; Pollack Society Student Scholarship.
Patients and Families of the United Mitochondrial Disease Foundation, Central VA Chapter.
