

Career Plan

In the next three to six months, I would like to graduate with my Bachelor's in Computer Science and begin a full-time job as a software developer. In the next several years, I plan to have more knowledge in my field and be preparing for graduate school. After graduate school, I hope to explore other areas of Computer Science and get the opportunity to become a penetration tester. I also plan to move to a bigger city to settle down and enjoy life.
