

Career Plan

I plan to attend graduate school at the University of Arkansas majoring in Computer Engineering. I also plan to take the GRE during summer 2020, so I can apply to the University of Arkansas graduate school. If I am accepted into the University of Arkansas graduate school, I plan to keep working as a research assistant for Dr. Jia Di at TruLogic. Furthermore, I hope to expand my knowledge about asynchronous circuits and learn more about integrated circuit chip design.
