

William Harris

### Career Plan

I'm planning on graduating in December 2019, at which point I'm interested in either continuing to work a full time job at the Fayetteville Public Library, where I will advance my IT certifications, or I'll be moving to JB Hunt for continued software development. It all depends whose hours are most comfortable, and who pays more. At some point at either job, I intend to continue working on freelance game development and hopefully self publish a game I've been working on for some time. I do not currently intend to seek a masters or PHD in Computer Science, but may continue instead to look into IT certification as mentioned above.
