

## Career Plan

If all goes well, I will graduate in December 2019. After graduation I currently do not have a company lined up to hire me, however, I would like to find work internationally. This summer I will be studying abroad, this will give me the opportunity to try to find a company that I would like to pursue working for, hopefully I will be able to find an internship opportunity. If I cannot find a company or I am unable to work internationally, I will pursue a career in game development here in America.
