

Joseph Gorman – Career Plan

I am currently a Senior at the University of Arkansas pursuing a B.S. degree in Computer Science. I have experience with several programming languages. I currently do not have any internship experience, nor do I have one as of now, but I am pursuing one. I am also exploring what my options are as far as personal projects as I have not really had the time to explore what I can do with my skills since I have been taking summer courses all throughout my time as an undergraduate until now.

3 - 6 Months

- Gain an internship.
- Complete passion projects.
- Graduate from the University of Arkansas.
- Gain full-time employment after graduation,

6 – 12 Months

- Gain a full-time position if not already gained.
- Work at said position for a year then decide if I want to stay or go somewhere else.
- Start saving money for property.

12+ Months

- Decide whether to stay at my current job/location or not.
- Start investing.
- Continue my life-long learning and experience in the field of computer science.

Long Term Goals and Personal Goals

- See new places around the world.
- Buy my dream home/car/etc.
- Do something for the greater good.
- Start a family.
- Retire at a reasonable time.
