1. This information provides guidelines for asphalt paving including base and drainage requirements and materials. Temporary facilities and controls are covered in other parts of these standards or are available from the Facilities Management (FM) project representative.

2. FM project representative, Public Safety Office, and Environmental Health and Safety Office shall approve selection of materials, means, and methods. Unless otherwise approved, design intent requires means and methods that provide minimal disruption to adjacent building activities and operations.

3. When working on or adjacent to occupied buildings, require means and methods that protect occupants from exposure to noise, dust, traffic, and other hazards.

4. Identify in contract documents if a special inspector will be employed to monitor compaction of subgrade or other earthwork.

5. Installer shall have a minimum of five years’ documented experience installing hot mix asphalt paving.

   a. Single course: 3” minimum depth.
   b. Two course: Base 4” minimum depth, top course 3” minimum depth.

7. Asphalt Mix: Pathways: Class “G” asphalt, 3” depth.

8. Striping paint:
   b. Temporary markings (short term): Benjamin Moore and Company or approved M58 safety and zone marking paint.
